CyberLock®

Corvallis, Oregon (March 2022) – CyberLock, Inc., a global leader in key-centric access control solutions, wins a Platinum Secure Campus Award!

CyberLock is proud to announce that CyberAudit-Web 9.5 (CAW) is the recipient of a Platinum Secure Campus Award in the Access Control Software Category. This award is given based on features, innovation, user friendliness, interoperability, quality, and more. CAW 9.5 brings together more access control options than any previous version. CAW 9.5 offers access to hardwired doors via Bluetooth, infrared, RFID, and more. CAW 9.5 provides one suite for managing CyberLock systems. CAW 9.5 can assign keys, set expirations, configure access schedules, and provide audit and reporting capabilities. The innovative new features include the Google Maps integration, offering users the ability to see where all their CyberLock components are located.

CAW 9.5 provides support for a number of new CyberLock products including ValidiKey Ring and Flex II FlashReader Keypad. Built with campus security in mind, CAW 9.5 can manage large outdoor sporting facilities as easily as offices and classrooms inside the building.

CAW 9.5 adds features that are ideal for institutions of all sizes that require convenient access control throughout the entire campus. Support for CyberLock's Flex II FlashReader Keypad provides hardwired access control that allows for 6 different entry credentials. This brings flexibility to access management for contractors, employees, students and more.

CyberLock is proud to meet the needs of customers all over the world. With over 20 years in the security industry, CyberLock is a trusted name in access control. For more information on CyberAudit-Web 9.5 or the CyberLock system in general, visit www.cyberlock.com or give us a call at 541-738-5500.
